# On-site Safety Services

# Health, Safety, Environment and Quality

## Policy and Commitment to our Clients

*It is the policy and commitment of Wellsite Protective Services, Inc. to promote and maintain the highest standards of Occupational Health, Safety, Environment and Quality Management. Through the development of a team approach; including management, consultants, contractors and employees, together we will build a lasting behavior based safety culture. (1) Always striving to prevent personal injury and the negative impacts on health and well-being. (2) To decrease business and production schedule interruptions. (3) To minimize operational and financial loss.*

Wellsite Protective Services, Inc. will custom tailor; to your site specific needs, our completely self contained portable medical / safety facilities with individual staff or multiple personnel.

Our HSE certified EMT/Paramedics, confined space rescue technicians and rope access rescue technicians through diligent accountability and progressive advancement will secure a behavior based safety culture and injury free management plan .

Beginning with risk and hazard analysis; combined with regular site monitoring and evaluation, we will collaborate with senior staff to develop a trackable and updatable remediation plan. Allowing us to mitigate accidents or injuries, implement or adjust training practices or engineering controls and evaluate and assign proper PPE for the highest expectation of safety and cost benefit..

Should injury occur; utilizing highly skilled care providers and the industry leading standard of on-site portable treatment facilities, we immediately evaluate and provide initial treatment and follow-up care leading to a quicker determination of employee status and more favorable outcome.

On or offshore; triage to treatment, your protection for oil and gas, construction, alternative energy or disaster response.

## Client Services

### Site Evaluation / Audit Service / Safety Management

Site specific evaluation and monitoring of environmental, project and process hazards, and strategies. Including; the review of corporate standards or regulatory compliance policies. (JHA's: Job Hazard Analysis, OSHA required reporting, etc...) Up to the complete development and implementation of comprehensive overall Safety Management Plans.

### Confined Space / High Angle / Rope Access Rescue

Confined space evaluation, monitoring or rescue operations. Including permit development, reporting compliance and closeout as necessary. Our Rope Access and Confined Space Rescue Technicians hold multiple complimentary certifications in EMS, SCUBA, and Hazardous operations for the highest standards of proficiency and client protection.

### Employee / Contractor Compliance / Continuing Education Training

Site specific safety training recognized and approved by local and national authorities for CEU's through multiple agencies. Including; Medical training and certification on American Heart Association CPR, First-aid, AED and Bloodborne Pathogen.

### Industrial Medical Services / Emergency Eyewash / Emergency Showers

Immediate on-site injury treatment and follow-up appointments at multiple care levels. Including; DOT certified, random or reasonable suspicion drug and alcohol screening. Qualitative or Quantitative respiratory fit testing.
